Skills

C#
Python
Nextjs
Docker
Git
Github actions, gitlab CICD, azure devops

Education

Fontys Hogeschool HBO-ICT, bachelor (Graduated)
Summa College ICT-Beheerder, MBO (Graduated)

Overview

I love to solve problems and I work on projects in my own private time. I do this because I want to learn more about creating software on different platforms such as the web, console, desktop.

Experience

Internship at F19 Digital Reporting

Period: feb. 2026 - jul. 2026

During my graduation internship, I designed and developed a prototype web application for comparing financial reports stored in the XBRL-JSON format. The project involved researching methods for analysing financial data and presenting meaningful comparisons between companies through an intuitive web interface.

Employee at ACA-IT Solutions (Eindhoven)

Period: jul. 2022 – now

I am responsible for creating powershell modules for calling various api's for the services they use (Microsoft dynamics, fortimanager, etc). I worked on making a CICD pipeline in azure devops for testing and pushing the modules from the dev branch to the master branch.

Internship at ACA-IT Solutions

Period: feb. 2022 - jul. 2022

I was responsible for helping customers with their IT related problems. I was also responsible for creating an instruction document on how to change certificates for various servers.

Internship Servicedesk at Cubesix (Weert)

Period: aug. 2020 - feb. 2020

I was responsible for helping customers remotely for their IT related problems. This ranges from ms office related problems and hardware related problems. I was also responsible for installing Zabbix proxies for the monitoring server. I was also tasked to prepare laptops and servers for deployment for customers.
